To: Cynthia Caporale/ESC/R3/USEPA/US@EPA,

OK!
I do hope that the TP is removed from the parameter listed in March! I have more work that I can handle now. There are three more work orders for this month. I will not be able to be finish with all of these before the next sampling begins. It would be better if the sampling is moved a couple of weeks. I do hope that this will be the end of the sampling!

Ron,

There are names on your distribution list that must not be included on these emails (or any emails related to EPA business). Please ensure you remove non-EPA email addresses when you reply or send emails to a group.

This appears to be from your home computer (or webmail) so you will need to make sure the change is made on that computer.

Thanks,
Cindy

I have not found any TP or o-phosphorus in 40 samples. We need to remove the parameter immediately. It takes 2 days to run the analysis. I have more work than I can handle.
